SKILLS

RECENT PROJECTS

stepchange.earth (06/2022 - 10/2022) [🔗](#)

- The [Saas application](#) is basically work for B2B customers, where they can track their carbon emission which is produced by the industrial operations. and also they have the multiple level of data analysis is there in the system.
- The end user portal is build on the [React.JS](#) and the back-end was on the [Spring Boot](#), so in this project I have done the front-end part by using [React.JS](#) with multiple custom things.
- In this project I have integrated all the back-end REST API's which was needed, and also the user authentication part i have integrated with the [AWS Cognito](#) service. [🔗](#)

99gift.in (09/2021 - 02/2022) [🔗](#)

- Written API for the entire application i.e. front-end and Mobile Application as well.
- Integrated API's with 4 Partners, and also handled API for end-users.
- Designed and develop B2C Giftcard panel for publicly uses.
- The bulk order, API Partner Panel, Corporate panel and user panels are designed.
